Set up once.
Price your next job.

Your calculator is ready. Tap the button below to open it in your phone, tablet or computer browser. No extra account is needed.

OPEN YOUR CALCULATOR

https://uk-plumbing-calculator.pages.dev/

If the button does not open, copy the address above into Safari, Chrome or your usual browser. Bookmark it for next time. Internet access is required.

01 / Find your day rate

Enter your annual pay target **before personal tax**, business costs and realistic billable days. Exclude unpaid admin, quoting and time off. Choose your business profit margin, then select **Save my settings**. The 20% starting margin is an example, not a recommendation.

02 / Price the job

Add days or hours, materials at cost, and job-specific extras. Avoid counting costs twice. Add a contingency if needed. Leave your chosen price blank to use the suggestion, or enter your own price to see what it leaves you. Margin is applied once.

03 / Check one extra day

Keep the agreed price and add another day of pay and overheads, plus any delay costs. A negative surplus means the price no longer covers your full pay target and allocated costs. It does not necessarily mean a cash loss. Figures are before personal tax.

04 / Prepare the customer quote

Enter business and customer details, scope, exclusions and payment terms. Select **Preview customer quote**, then **Print / Save as PDF**. On phones, use the available print/share options. Turn off browser headers and footers. Internal costs and margin stay off the quote.

Keep your setup. Keep your quote.
Settings stay in this browser only. Export a backup before changing devices or clearing browser data. Job and customer details are not saved: save the finished quote before leaving. Internet is required to reopen the calculator.

VAT: Not registered? Include VAT paid in costs; no VAT is added to your quote. Registered? Exclude recoverable VAT, include VAT you cannot reclaim and choose the rate applicable to the job. Check HMRC guidance.

Keep this PDF to recover the access link. For product help, use the seller support contact in your Hotmart purchase details. For planning domestic plumbing work by a sole trader. Not a tax assessment; Income Tax, NI, CIS and domestic reverse charge are not calculated.
